

U.S. Bank is pleased to announce a variety of enhancements coming to Fleet Commander® *Online* on November 16, 2014:

Fleet Commander® *Online* User List Update

The Print and Export functionality will be available for the Fleet Commander® *Online* User List, making it easier to save and/or share User Management search results.

Search and Select Enhancement

The Search and Select function will allow Account, Card, Driver and Vehicle selection(s) to be saved, improving search performance, as information doesn't need to be entered multiple times.

Organization Level ID Added to Reporting

The Organization ID will be an available column which can be selected on several reports, providing an easier way to distinguish information based on a specific organization/company.

Odometer Reset Available

A "Correct Odometer" button will be added to the Transaction Detail Report, allowing users to correct an odometer value on posted transactions, resulting in more accurate reporting.

Voyager User Field Update

The Voyager User Field will no longer allow special characters to be used.

External User Password Reset Change

For added security, at the time of a password reset, the User Password must be between 8 and 100 characters in length and contain at least one alpha and one numeric/special character.

If you have any questions, please contact your U.S. Bank Relationship Manager or U.S. Bank Fleet Customer Service at 800.987.6591.

Thank you.
