

Dear State of Ohio/DAS Member,

The State of Ohio/DAS is adding a **valuable new benefit** to your pharmacy plan administered by Catamaran.

Effective September 1, 2013, BriovaRx[™] will be your exclusive Specialty Pharmacy.

With the supportive service offered through BriovaRx[™], you will be called each month by an experienced Patient Care Coordinator who will coordinate your next delivery of specialty medications with you. You will have access to experienced clinicians, both pharmacists and nurses, who can counsel you about why your medication was prescribed, how it works, how to administer and store the drug, help you to manage any side effects, and sometimes just answer any question or concern you may have. This level of service and support has been proven to increase the quality of outcomes from specialty medication therapy.

As of September 1, 2013, BriovaRx will be handling all of your specialty medication needs. Having BriovaRx as the exclusive provider of your specialty medications will give you the peace of mind knowing you have a personal care provider watching out for your medication needs. Specialty medication care is all we do. Our pharmacists are highly trained to understand your special therapy needs and we will ship the medication to your home or other designated address in safe, temperature-controlled and tested packaging, at no cost to you.

Here's what you need to do:

Someone from BriovaRx will be reaching out to you prior to your next specialty medication shipment. If you would like to enroll right away, you may call BriovaRx at (800) 707-8194. Our Patient Care Coordinators will guide you through the process. They are already aware that you will be joining us, and are ready to help.

Please read the attached "Frequently Asked Questions" handout for information about the full range of services our pharmacy will provide to help guide and support you on your medication therapy.

We look forward to providing you with superior pharmacy services.

Sincerely,
Michael Zeglinski
Vice President, Specialty Pharmacy Operations - BriovaRx[™]
