

Effective July 1, 2014, certain bowel preparation agents and Vitamin D supplements will be added to the preventative drug list for eligible members. **Select products will be available at \$0 copay.**

Bowel preparation agents for colorectal cancer screening:

Eligible Products: Generic prescription bowel preparation agents [examples: Polyethylene Glycol 3350, NuLytely®, TriLyte®), for adults 50 years of age or older. To ensure appropriate utilization, a quantity limit of 1 product per year applies. This excludes branded bowel preparation products*.

Vitamin D Supplementation

Eligible Products: OTC vitamin D supplementation products (single ingredient only, with prescription – example: Nature’s Bounty® Vitamin D3) for adults 65 years of age or older. This excludes prescription vitamin D supplementation products and combination products containing vitamin D*.

**Excluded medications may still be covered under the standard benefit at regular copay levels.*
