

**Power User of the Month: Yancy Wessell**

Yancy Wessell serves as an Information Technologist 3 at the Ohio Department of Transportation and holds a BS in Computer Information Science from The Ohio State University and a MS in Engineering (specializing in Engineering Management) from Ohio University. He is a long term employee of ODOT and has also served as a System Programmer, Database Analyst, and System Analyst during his career.

I became aware of Learn IT Ohio as part of the IT Transformation and used the business analysis and project management coursework to supplement traditional training. Continuous learning in a wide range of topics is required to stay relevant today and I like the flexibility of Training on Demand. There are short (3-5 minute) videos on “soft-skill” topics such as effective listening as well as audio books which can be played at any time. Courses in Lean- Six Sigma have been beneficial as I work towards certification. I recommend it to colleagues – use the easy search function to find videos of interest then follow up with a book or course on the topic. Learn IT Ohio is convenient and can be a useful part of your training goals.
