Note: Machine to Machine coverage included the Verizon Wireless 4G, 3G and 3G Extended networks. Current data coverage details can be found at www.verizonwireless.com.

Sharing: Customer must maintain a minimum of five (5) M2M lines choosing a Custom Mobile Broadband Machine-to-Machine Megabyte SharePlan at all times to qualify, otherwise Verizon Wireless reserves the right to cease offering these plans and may migrate existing M2M lines to the Mobile Broadband M2M Plans (without sharing). Sharing among M2M lines is available only among lines active on plans in the same sharing tier. Customer must maintain a minimum of 5 lines on the Machine to Machine plans in order to share data. Each sharing Line's unused KBs will pass to other sharing Lines that have exceeded their data allowance, during the same monthly bill cycle. Unused KBs will be distributed proportionally as a ratio of the KBs needed by each applicable M2M Line to the total KBs needed by all sharing M2M Lines. Some accounts may require special handling, which may take 1 to 2 bill cycles, before sharing is available Plan changes may not take effect until the billing cycle following the change request.

TO SERVICE ATTACHMENT 2
TO THE MASTER SERVICE AGREEMENT
MACHINE TO MACHINE SERVICES**

Machine to Machine Data Plan Terms and Conditions

Machine-to-Machine ("M2M") refers to the transmission of data using the Wireless Service between wireless devices and computer servers or other machines, or between wireless devices, with limited or no manual intervention or supervision. All terms and conditions of the Agreement apply to M2M service, which shall be deemed a "Wireless Service," and M2M Lines, except as modified below.

Eligible M2M Plans: Verizon Wireless M2M plan with a monthly access fee of \$34.99 or higher unless such plan specifies that discounts are not applicable. M2M plans can be activated on a 12-month Line Term.

M2M Line: An individual line of Wireless Service used for Machine-to-Machine transmission.

M2M Equipment: Customer must provide its own M2M equipment, which must be listed on Verizon Wireless' approved device list at the time of activation, when activating service on a Verizon Wireless M2M Plan. Unless otherwise approved, customer may not activate equipment purchased from Verizon Wireless on M2M plans.

M2M Management Center: The Machine-to-Machine Management Center ("M2M Management Center") provides Customer with the ability to remotely monitor and manage its M2M devices. If Customer desires to access and use the M2M Management Center, it must so request in writing, and Verizon Wireless shall provision the M2M Management Center on Customer's account. Applicable rates and charges, if any, shall be set forth in this Addendum. The M2M Management Center may be provided by Verizon Wireless' third party supplier nPhase. The set-up time is estimated to take four to six weeks. The rights granted to Customer herein for access to and use of the M2M Management Center are specific to Customer and may not be transferred to another party without Verizon Wireless' prior written consent. Verizon Wireless and nPhase retain full and exclusive ownership of all intellectual property rights associated with the M2M Management Center including any alterations, modifications, improvements and derivative works thereof. The limitation of liability, limitation of damages and disclaimer of warranties sections of the Agreement apply to nPhase and to services provided hereunder by nPhase.

M2m Plan Details. A data session is inactive when no data is being transferred, and may seem inactive while data is actively being transferred to a device, or seem active when actually cached and not transferring data. " Customer must maintain virus protection when accessing the service and is responsible for all data sent and received including "overhead" (data that is in addition to user-transmitted data, including control, operational and routing instructions, error-checking characters as well as retransmissions of user-data messages that are received in error) whether or not such data is actually received. Verizon Wireless will not be liable for problems receiving Service that result from Customer's device.

Megabyte (MB) Data Plans: M2M data usage is rounded to next full kilobyte at end of each billing cycle. Any unused portion of the megabyte allowance is lost. Equipment will not indicate kilobyte usage.

NationalAccess Roaming Feature: Not for use with Mobile Office Kits. Dynamic IP addresses will be assigned when roaming. Usage rounded up to next full kilobyte. For information on where NationalAccess Roaming is available, see www.verizonwireless.com.

Roaming in CDMA countries outside of the US: Roaming in CDMA countries is \$0.69 per minute plus the servicing carrier's long distance charges, toll charges, surcharges and taxes, which are billed on a pass-through basis. Roaming rates in Canada and Mexico may vary. Roaming in CDMA countries is only available in "CDMA" mode where service is available. An update to Equipment software is required to roam in S. Korea.

Data Roaming: *In the Canadian Broadband and Canadian Enhanced Services Rate and Coverage Areas, usage will be charged at a rate of \$0.002/KB or \$2.05/MB. In the Mexican Enhanced Services Rate and Coverage Area, usage will be charged at a rate of \$0.005/KB or \$51.2/MB. For more information on roaming in Canada and Mexico, visit verizonwireless.com/naroaming. In the Bermuda, China, Dominican Republic, Guam, India, Israel, Saipan and South Korea Enhanced Services Rate and Coverage Areas, usage will be billed at a rate of \$0.02/KB or \$20.48/MB. 1-Dial is needed to roam in many destinations. Only the Canadian Broadband Rate and Coverage Area supports EV-DO.*
