

BUSINESS INNOVATION

“Innovation is not the product of logical thought, although the result is tied to logical structure.” – Einstein

What really fosters innovation?

Innovation is considered a timely art, a spark of genius, a rare occurrence of brilliance where the right ideas converge at the same place resulting in a significant advance.

- What are the skills and behaviors of innovative individuals?
- Do others consider me to be innovative? Why or why not?
- How often do I challenge the status quo?
- How do I respond when my ideas are met with resistance?

More information on Business Innovation and other valuable resources are available to exempt and IT professionals via Learning on Demand.
