

STATE OF OHIO (DAS)

CLASSIFICATION

SPECIFICATION

CLASSIFICATION SERIES

Sanitarian Program

MAJOR AGENCIES

Health & Agriculture only

SERIES NUMBER

6573

EFFECTIVE

11/10/2019

SERIES PURPOSE

The purpose of the sanitarian program occupation is to provide advice, consultation & direction to local health departments, industry & citizens concerning state environmental health science programs & conduct inspections &/or investigations for compliance with state regulations pertaining to environmental health science conditions.

At the lower level, incumbents perform inspections, surveys &/or investigations & enforcement activities &/or assist in providing technical assistance under direction of higher-level sanitarian program specialist in one or more environmental health science areas &/or multi-disciplinary public health services (e.g., grade a milk &/or dairy, radon, food protection, manufactured home parks, recreation vehicle parks, recreation camps, public swimming pools, spas & special use pools, marinas, private water supply, hazardous & toxic substances, consumer product safety, lead, asbestos) &/or conduct program evaluations of milk &/or dairy interstate shipment or similar program by established numeric rating system to determine if collection &/or hauling of samples &/or products is in compliance with applicable laws & rules.

At the middle level, incumbents serve as senior sanitarian over employees classified as Sanitarian Program Specialist 1, 65731 in assigned region, or act as technical expert for one or more environmental health science areas &/or multi-disciplinary public health services &/or act as lead worker over lower-level sanitarian program specialists &/or review survey packages completed by lower-level sanitarian program specialists, grantees &/or contractors.

At the supervisory level, in Ohio Department of Agriculture only, incumbents manage, plan, coordinate & direct dairy inspection & enforcement activities in assigned region of state & supervise sanitarian program specialists, or in Ohio Department of Health, manage, plan, coordinate & direct public health lead investigation & enforcement activities, in assigned region of state & supervises sanitarian program specialists.

At the first administrator level, incumbents supervise employees classified as Sanitarian Program Specialist 1, 65731 &/or 2, 65732 & if assigned, other staff in the performance of environmental health science &/or multi-disciplinary public health services in one or more programmatic or functional area, & in Ohio Department of Agriculture only, supervises Sanitarian Specialist Supervisor, 65735, if assigned.

At the second administrator level, incumbents supervise two or more subordinate employees one of which is classified as Sanitarian Program Administrator 1, 65736 & plan, design, manage & conduct statewide environmental health sciences &/or multi-disciplinary public health programs for assigned section & in the Ohio Department of Agriculture only, supervise lower-level sanitarian program staff.

Glossary: The terms listed, whenever they appear in this document, are to be interpreted to mean the following:

Environmental Health Science: means the aspect of public health science that includes, but is not limited to, the following bodies of knowledge: air quality, food quality and protection, hazardous and toxic substances, consumer product safety, housing, institutional health and safety, community noise control, radiation protection, recreation facilities, solid and liquid waste management, vector control, drinking water quality, milk sanitation and rabies control. This definition in its entirety is quoted from Section 4736.01(a) of the Revised Code.

Practice of Environmental Health: means consultation, instruction, investigation, inspection, or evaluation by an employee of a city health district, a general health district, the Ohio Environmental Protection Agency, the Department of Health, or the Department of Agriculture requiring specialized knowledge, training and experience in the field of environmental health science, with the primary purpose of improving or conducting administration under any of the following: (1) Chapter 911. 913., 917., 3717., 3721., 3732., or 3733. of the Revised Code; (2) Chapter 3734. of Revised Code as it pertains to solid waste; (3) Section 955.26, 3701.344, 3707.01, 3707.03, or 3707.33 to 3707.99 of the Revised Code; (4) rules adopted under Section 3701.34 of the Revised Code pertaining to home sewage, rabies control, or swimming pools. 'practice of environmental health' does include sampling, testing, controlling of vectors, reporting of observations, or other duties that do not require application of specialized knowledge and skills in environmental health, science performed under the supervision of a registered sanitarian. This definition in its entirety is quoted from Section 4736.01(e) of the Revised Code.

Sanitarian: means a person who performs for compensation educational, investigational, technical or administrative duties requiring specialized knowledge and skills in the field of environmental health science. This definition in its entirety is quoted from Section 4736.01(b) of the Revised Code.

Senior Sanitarian: serves as lead worker in Department of Agriculture (i.e., provides oversight, work direction, training, reviews work, accompanies on inspections & reinspections & makes final recommendations on enforcement to sanitarian program administrator) over employees classified as Sanitarian Program Specialist 1, 65731 in assigned region & when assigned, acts for immediate supervisor.

Note: some aspects contained in the definition of “environmental health science” may be performed by incumbents who are registered sanitarians but who are assigned other state classifications (e.g., environmental scientist, 8586).

JOB DUTIES IN ORDER OF IMPORTANCE (These duties are illustrative only. Incumbents may perform some or all of these duties or other job-related duties as assigned.)

Conducts program evaluations of milk &/or dairy interstate shipment or similar program by established numeric rating system to determine if collection &/or hauling of samples &/or products is in compliance with applicable laws & rules, &/or conducts environmental health &/or construction inspections, surveys &/or investigations & enforcement activities in one or more environmental health science areas (e.g., grade a milk &/or dairy, food protection, manufactured home parks, recreation vehicle parks, recreation camps, public swimming pools, spas & special use pools, marinas, radon mitigation, asbestos abatement, lead risk assessments, private water supply, hazardous & toxic substances, consumer product safety), &/or assists higher-level sanitarian program specialist as directed in providing technical assistance & consultation (e.g., reviews laws, rules & their significance; demonstrates inspection techniques which includes questioning operators &/or contractors, observing practices & identifying violations; explains violations to local health sanitarians & operators or contractors, informs them of significance of each violation & advises them as to how to correct violations; dictates/edits violations; offers solutions to problems that exist in operation) to local health department personnel in one or more area of specialty (e.g., environmental sanitation, food protection, manufactured home parks, recreation vehicle parks, recreation camps, public swimming pools, spas & special use pools, marinas, private water systems & private household sewage disposal systems).

Conducts field investigations of & provides advice & consultation (i.e., transmits interpretation of rules & regulations which have been made by higher-level sanitarian program specialists) to local health departments & industry; investigates complaints & recommends course of action to complainant, local health department &/or industry; assists local health department staff in resolving private water system problems by conducting technical inspection of wells (e.g., down hole camera inspections); collects water & other environmental samples according to established protocols & transports samples to laboratory for analysis.

Gathers data & information & reviews plans for new or extensively altered facilities; assists engineers during peak periods with plan review functions for routine plan review for less complex projects (e.g., primarily small swimming pools under direct supervision of engineer).

Conducts tests of new equipment, devices & systems; investigates complaints & offers solutions; conducts inspections & investigations of agricultural labor camps; assists local health departments in foodborne outbreak investigations &/or illnesses probably resulting from unsanitary conditions.

Implements individual &/or group training as developed by higher-level sanitarian program specialists to local health departments & industry in environmental health science areas (e.g., milk sanitation; carbon monoxide; hazardous & toxic substances; premises sanitation; vector control; migrant camp sanitation; food quality & protection; consumer product safety; drinking water quality; asbestos; lead; radon; rabies control); compares & contrasts local health department performance to required procedures & guidelines to recommend training or additional assistance warranted.

Performs miscellaneous administrative duties (e.g., prepares reports & correspondence; assists in developing or develops educational materials; assists in conducting or conducts special studies; attends staff meetings; gives speeches & presentations to schools, industry groups & other service or professional organizations; testifies in administrative hearings & court trials); reviews & evaluates applications from individuals/contractors applying for licensing as radon mitigation expert &/or tester or from individuals applying for asbestos abatement certification & makes recommendations to supervisor regarding acceptance or denial.

MAJOR WORKER CHARACTERISTICS

Knowledge of human &/or public relations; state & federal laws & agency policies, rules & regulations regarding environmental health science of assigned area; environmental health science or dairy science; general management*; arithmetic to include algebra. Ability to prepare meaningful, concise & accurate reports; define problems, collect data, establish facts & draw valid conclusions; use proper research methods in gathering data; gather, collate & classify information about data, people or things; handle & resolve sensitive inquiries from & contacts with officials & general public; demonstrate physical fitness.

(*)Developed after employment.

MINIMUM CLASS QUALIFICATIONS FOR EMPLOYMENT

Certificate of registration as sanitarian-in-training or sanitarian issued by Ohio State Board of Sanitarian Registration in accordance with Chapter 4736. of Revised Code, or eligible for registration as sanitarian-in-training or sanitarian in accordance with Chapter 4736. of Revised Code & must acquire certificate as registered sanitarian or sanitarian-in-training prior to engaging in practice of environmental health, but not later than 90 days from date of employment; in addition to proceeding, must meet one of following options appropriate for area to be assigned:

Positions in Dairy Program:

Completion of undergraduate core program in agriculture from an accredited college or university, with specialization in dairy science, animal science or food science or 24 mos. trg. or 24 mos. exp. in management of dairy production or dairy processing operations; must be able to provide own transportation.

All Other Positions:

Completion of undergraduate degree from accredited college or university including at least 45 quarter or 30 semester units of science courses in areas of biology, chemistry, physics, geology or mathematics & 24 mos. exp. in environmental health science position; must be able to provide own transportation.

-Or completion of undergraduate degree from accredited college or university with core program in environmental health science & 12 months experience in environmental health science position; must be able to provide own transportation.

TRAINING AND DEVELOPMENT REQUIRED TO REMAIN IN THE CLASSIFICATION AFTER EMPLOYMENT

Must possess certificate of registration as sanitarian issued by Ohio State Board of Sanitarian Registration, in accordance with Chapter 4736 of Revised Code, within 3 years from date of appointment to class.

UNUSUAL WORKING CONDITIONS

May work varying hours; may be exposed to disagreeable elements &/or hazardous materials; travel required; overnight travel may be required.

<u>JOB TITLE</u>	<u>JOB CODE</u>	<u>B. U.</u>	<u>EFFECTIVE</u>	<u>PAY GRADE</u>
Sanitarian Program Specialist 2	65732	013	09/26/1999	33

JOB DUTIES IN ORDER OF IMPORTANCE (These duties are illustrative only. Incumbents may perform some or all of these duties or other job-related duties as assigned.)

In Ohio Department of Agriculture, serves as senior sanitarian over employees classified as Sanitarian Program Specialist 1, 65731 engaged in milk/dairy related environmental health science inspections &/or investigations (e.g., of producers, processors &/or haulers) in assigned region of state;

OR

In Ohio Department of Health, acts as technical expert in one or more environmental health science programs &/or multi-disciplinary public health services (i.e., reviews, analyzes & evaluates verbal & written complaints related to assigned area, immediately assesses to determine severity & urgency of complaint & appropriate response on basis of applicable regulations & procedures, determines appropriate time frames for investigation & refers compliant to lower-level sanitarian program specialist to conduct investigation & serves as liaison with other state & federal agencies with respect to referrals not within programs regulatory authority; manages state mandated registration/certification program such as voluntary food service operator or private water system contractor registration or lead abatement licensure to include conducting technical review of applications & making recommendation for approval & serves as liaison to training providers or registrants by providing technical expertise & resolving issues of public health council rule interpretation regarding certification/registration; provides technical assistance to other sanitarians regarding findings of non-compliance with requirements for multiple statewide environmental health programs such as lead, radon & asbestos, evaluates findings of non-compliance in inspection reports from lower-level sanitarian program specialists & determines & recommends enforcement actions to administrator & provides technical expertise for development of protocols & procedures for initiation of enforcement actions) &/or acts as lead worker (i.e., provides work direction & training) over lower-level sanitarian program specialists & monitors their work to ensure consistent application of rules &/or reviews survey packages completed by lower-level sanitarian program specialists, grantees &/or contractors for accuracy & appropriateness of findings (e.g., interprets applicable laws, rules & regulations to correct or modify findings; recommends provisional status or sanctions in case of non-compliance).

Oversees staff in & provides technical assistance, consultation &/or training to local health departments, state agencies, grantees, contractors, industry &/or general public in one or more specialized areas; acts as technical liaison with other state &/or federal agencies concerning joint studies, committees, special projects &/or training & to ad hoc & formal advisory committee to develop recommendations concerning new/revised state laws & public health council rules.
