TDC Project Overview

**Purpose ...**

To create an online central repository of training resources for the consistent and ongoing development of state Human Resources professionals.

Project Charter Statements
Statement #1: Key Objectives

1. Develop and maintain an easily accessible online repository with a common curriculum that not only supports new Human Resources (HR) professionals, but also bolsters the overall knowledge base for all HR professionals.

2. Develop a HR competency model, identify and provide a variety of learning modules that focuses on strengthening the skills of HR professionals, to ensure proficiency, at any level.

3. Develop business and consulting competence that emphasizes strategic partnerships between HR professionals and agency leadership.

Statement #2: Key Deliverables

1. Develop a project plan with timelines to ensure key deliverable are met.

2. Design and develop a technology platform to meet the needs of HR professionals through populated content and resources.

3. Design and develop a communication/marketing strategy to create buy-in for successful implementation and promotion of the new resource tool.

4. Design and develop a plan for sustainability of platform, including maintenance, evaluation and resources (owner).
Statement #3: In Scope

1. The centralized HR repository will be tested by customer users through UAT, focus groups and online surveys.

2. Resources within the repository will include evaluation methods including surveys, assessments and web traffic data reports.

3. The HR repository will consist of online activities including web-based training (e-learning), electronic job aids, video tutorials and other HR related resources.

4. The HR repository will provide a virtual environment where HR professionals can collaborate to include: blogs, wikis and communities of practice.

Statement #4: Out of Scope

1. The HR repository will NOT include agency specific initiatives, processes and requirements.

2. The HR repository is ONLY for state HR employees and is not a resource for non-state employees.
Statement #4: Constraints

1. The change in administration may present a risk or constraint because new leadership may or may not support the concept of the TDC or its initiatives.

2. TDC must rely on resources outside of the training community for completion of its initiatives (e.g., website development, myOhio, DAS-IT, agency training departments, DAS Communications, DAS-HRD, etc.).

3. Due to organizational cultural differences across agencies, departments, and organizations, the TDC may face different levels of resistance to the new ideas it presents.

4. TDC members may experience increase(s) in workload, which may impact their ability to participate in the Council or project activities.
