Next Generation Telephony Solution (NGTS) *State of Ohio VOIP*

- Next Generation Telephony Solution (NGTS) is a hosted VOIP solution that leverages the latest advancements in VOIP technology, including:
 - Unified Communications
 - SIP Trunking
 - Cloud Telephony
 - Integrated Video Communications
 - Unified Messaging
 - Mobility

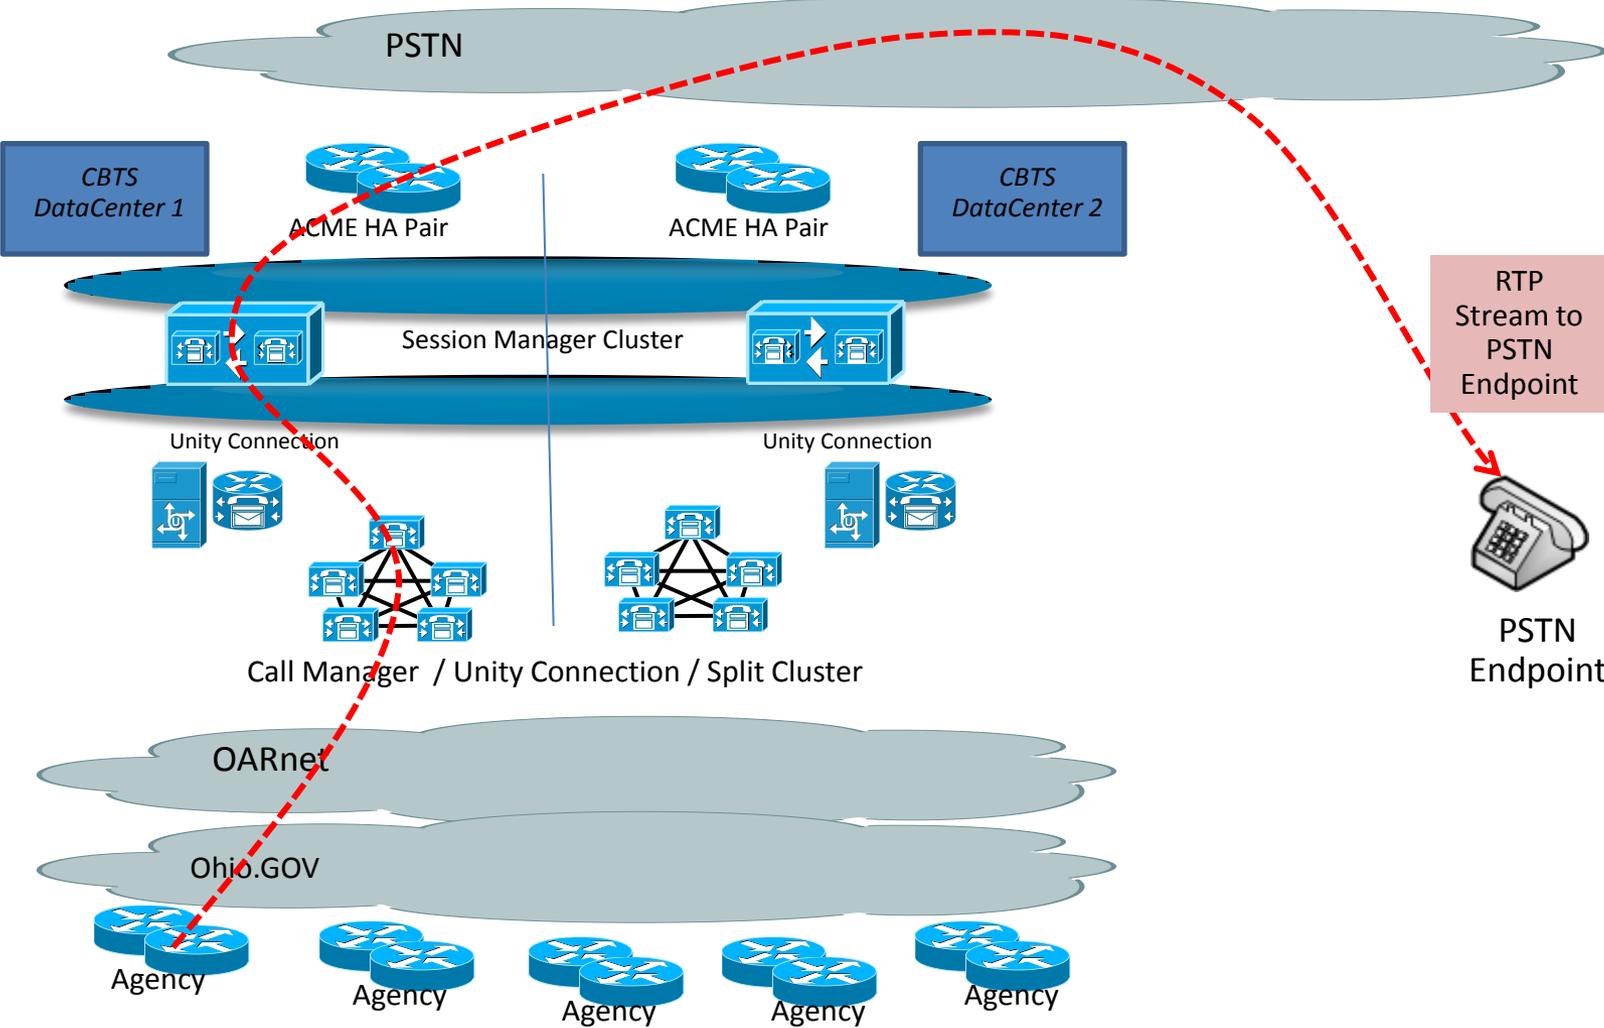

SIP Trunk Service

- As part of the Next Generation Telephony Solution provided by CBTS, agencies with existing telephony infrastructure have the opportunity to connect to the NGTS SIP Cloud
- SIP Trunk Service extends the agency's infrastructure by leveraging SIP trunking technology from their infrastructure to the NGTS Session Management layer.

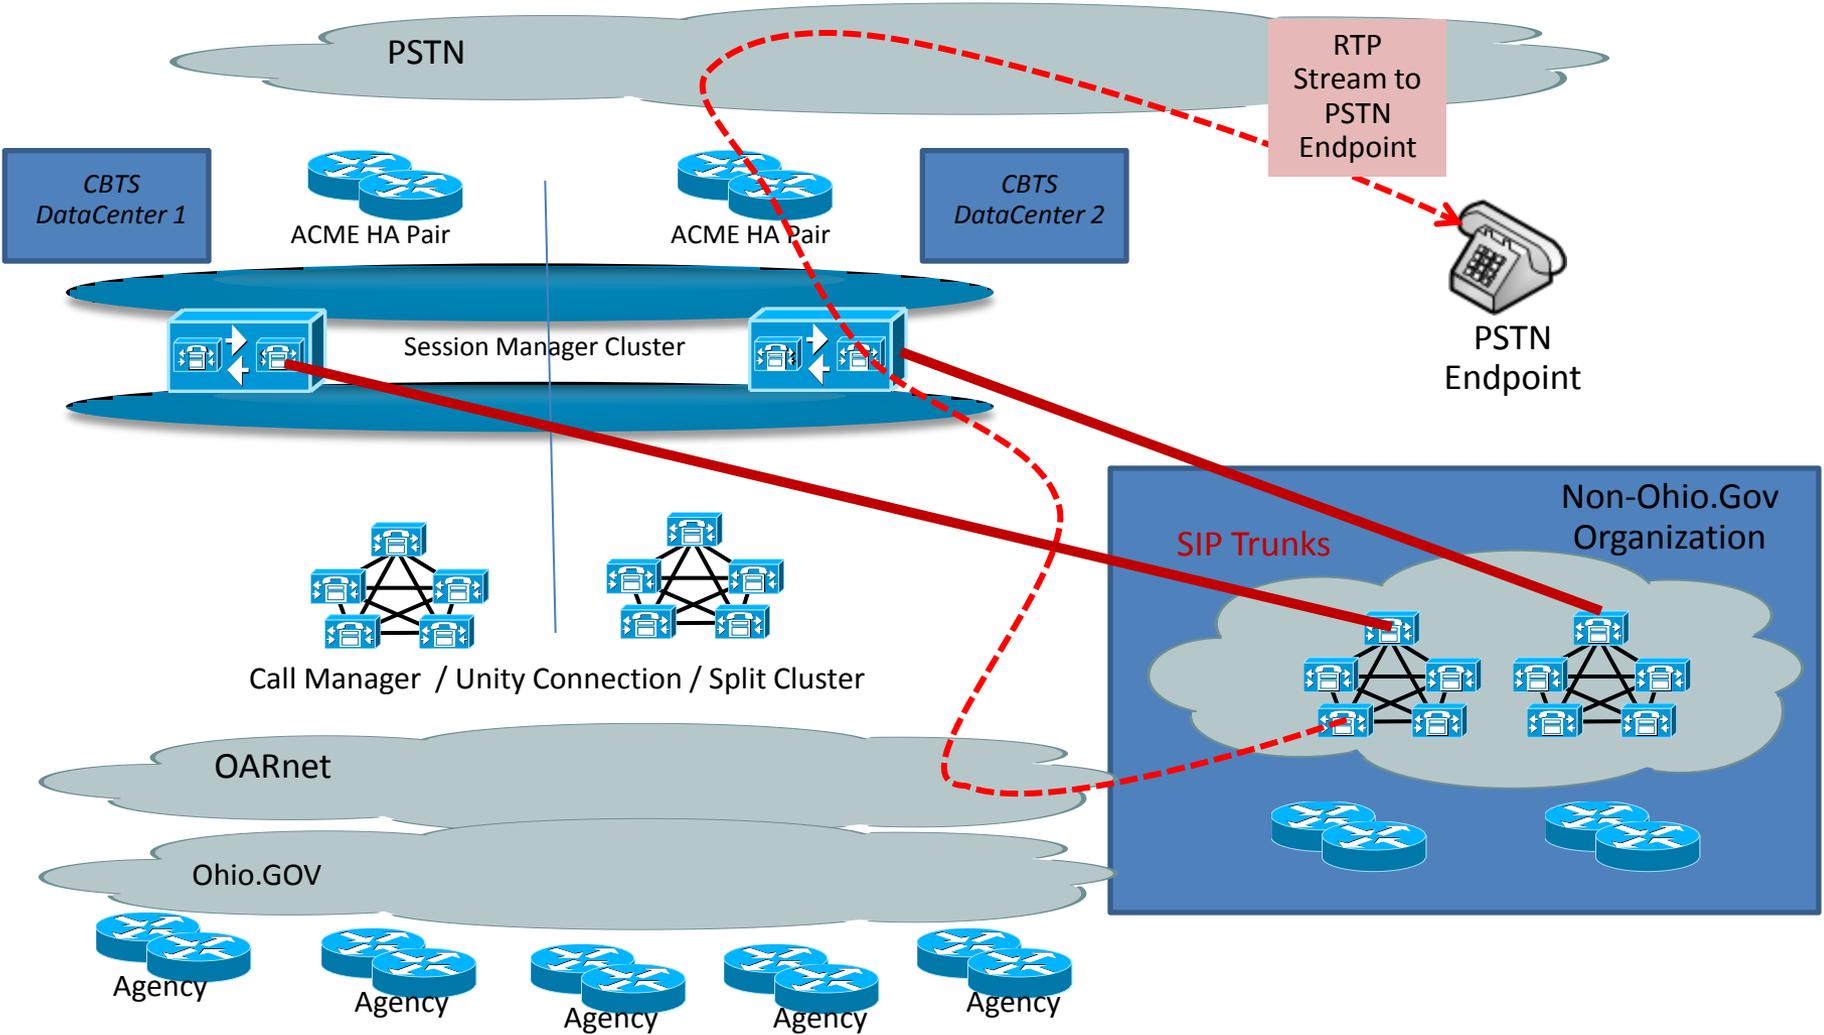

Benefits:

- All intra-state (Ohio) long distance eliminated
- Inter-state long distance at \$0.012
- Consolidate trunking enables smaller trunking overhead

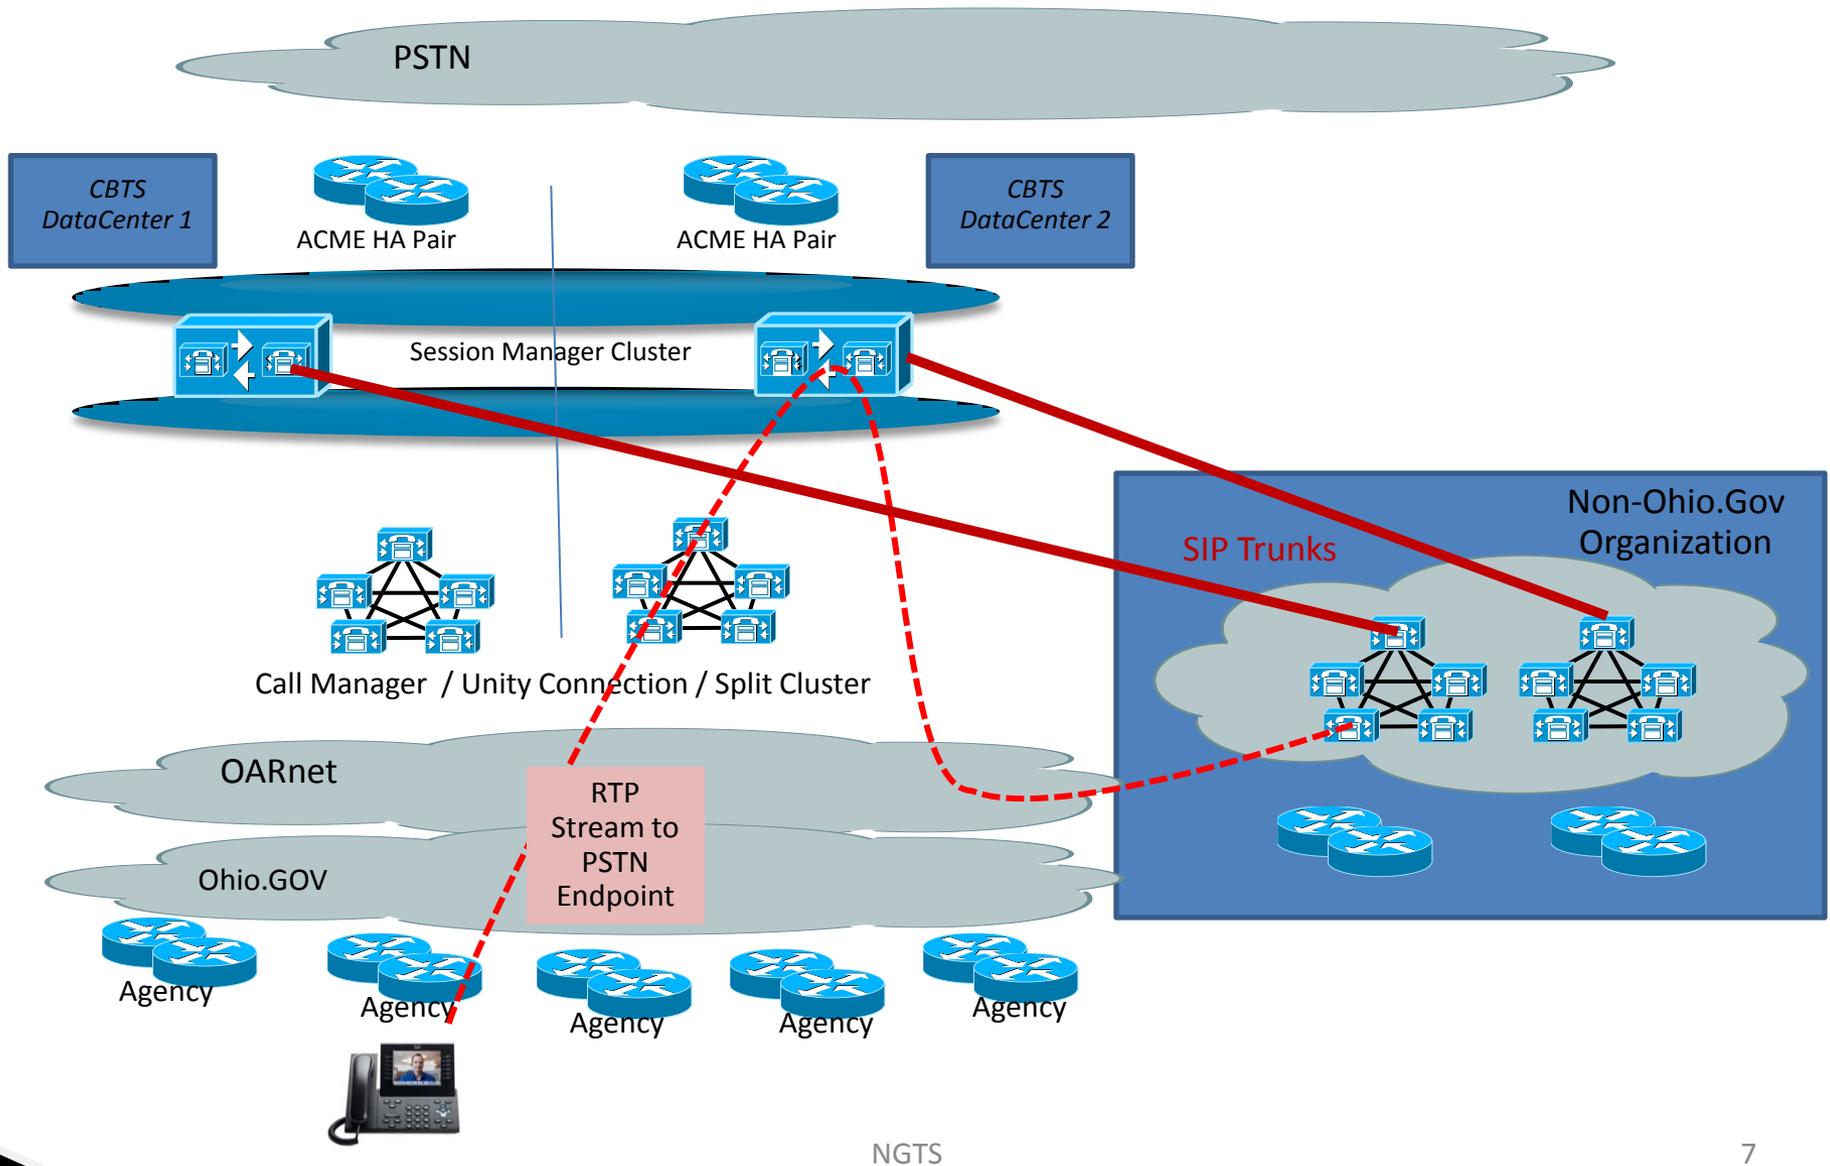

NGTS State of Ohio VOIP Call Flow

CBTS SIP Trunk Service Call Flow to Non NGTS

CBTS SIP Trunk Service Call Flow to Internal NGTS
