

Addendum 1 to Spectrum Service Attachment #4 Fiber Internet Access

Addendum 1

Fee Structure and Pricing Schedules

Effective as of: the Effective Date of Spectrum Service Attachment #4

1. Vendor is providing the following pricing to deliver FIA to the Subscribing Entities. Unless otherwise set forth in a quote, quotes provided to a Subscribing Entity by Vendor prior to such Subscribing Entity's submittal of an Order placed in the State's Ordering System shall reflect all MRC(s) and Non-Recurring Costs (as further described below) and, subject to Section 5 below, shall not be subject to additional Non-Recurring Costs. The pricing consists of the following components:

- 1.1 Bandwidth Pricing: This is the MRC for the connection to the Vendor network. This pricing is dependent upon the amount of bandwidth ordered, as well as the Term of Order. Bandwidth pricing includes inside construction/demarcation extensions costs, such that delivery of the Services from the outside of the building to the mutually agreed upon inside location as requested by the Subscribing Entity is provided at no additional cost.
- 1.2 Non-Recurring Installation Fee: This component consists of the necessary costs to install the connection. It is a flat fee regardless of the MRC or the amount of any other Non-Recurring Costs.
- 1.3 Non-Recurring Construction Cost: This component consists of the necessary expenses to deliver the Services to the outside Subscribing Entity location. Due to the individual requirements at each location, this component is calculated on an ICB.

4. FIA Change Fees.

Change Request	Non-Recurring Change Fee
Other Changes including: Adding/Deleting Static IP address, Setting up BGP, MACDs (moves, adds, changes, deletions) etc.	ICB

Note: These change fees may be waived with an extension of Subscribing Entities contract.

5. Non-Recurring Costs. Notwithstanding anything to the contrary in this Addendum, if during the course of installation Vendor determines additional work is necessary to enable Vendor to deliver the Services to a Subscribing Entity's Service location, Vendor will notify such Subscribing Entity of any additional Non-Recurring Costs in excess of the amounts specified above or previously specified in the quote provided to a Subscribing Entity by Vendor. If the Subscribing Entity does not agree to pay such additional Non-Recurring Costs by placing a revised Order in the State's Ordering System within five (5) business days of receiving the same, Vendor and the Subscribing Entity shall each have the right to terminate the applicable Order with no further obligation of either party after termination, provided that the Subscribing Entity shall nonetheless be responsible for charges incurred for the work provided by Vendor prior to such termination. Vendor may act as the Subscribing Entity's agent for ordering access connection facilities provided by other providers or entities when authorized by the Subscribing Entity to allow connection of a Service location to the network. "Non-Recurring Costs" means non-recurring
