Pricing Notes:

1. Metro-E Advanced Private Line (Metro-E APL) is a point-to-point service that is available within a metro (distance limitation is 80 km), and is priced as a complete service that includes both end locations. Metro-E APL service is delivered over private fiber with a switch at each end user location.
2. Switched E-Line is a point-to-point Ethernet Service. E-Line service traverses the Lightower MPLS core network using facilities shared with other customers. Pricing for each service location must be added together to calculate the Total MRC for each service.
3. Switched Ethernet LAN (E-LAN) service is a mesh Ethernet Service (any to any) priced per customer EVPL service traverses the Lightower MPLS core network using facilities shared with other customers. Pricing for each service location must be added together to calculate the Total MRC for each service.
4. Switched Ethernet Virtual Private Line (EVPL) is a hub and spoke service (one to many). EVPL service traverses the Lightower MPLS core network using facilities shared with other customers. Pricing for each service location must be added together to calculate the Total MRC for each service.
5. "Special Construction" charges may apply where Lightower must extend its existing fiber network in order to provide service to a customer location. In all such cases, these Special Construction charges will be identified and presented to the customer in the initial proposal for the customer's review and acceptance. Special Construction charges can be settled as a one-time payment or the sum can be broken up over 18 months. In the event that customer terminates a service with Special Construction charges prior to the expiration of the initial term, customer will be required to pay all unpaid Special Construction charges, in addition to the stranded investment charges set forth below, within forty-five (45) days of customer's receipt of the applicable invoice.
6. The customer is responsible for providing cable access via conduit or aerial means to the termination point within the customer's premises. The customer must also provide electrical power and UPS protection if desired. Lightower will provide a network interface device, usually a switch with the appropriate interface port. The customer is responsible for all interior cabling beyond the network interface device. The customer is responsible for any cross-connect charge imposed by third parties, such as telecom hotels, for the interconnection of Lightower service to the customer's location. Lightower will pass through such cross-connect charge without mark-up to the customer.
7. Lightower will provide technician labor for post installation move, add, and change work at rates that are specified above.
