

# Your formulary updates

Tier changes  
Effective July 1, 2022

This is a list of biannual tier changes made to your formulary. Each medication is placed in a tier that shows the cost level you may pay for that prescription. Your employer or health plan makes the decision on tier placements. Medications are grouped by the conditions they treat.

## Medication tiers

**Tier 1**  
Lower cost  
medications

**Tier 2**  
Mid-range cost  
medications

**Tier 3**  
Higher cost  
medications

In this formulary update, brand-name medications are shown in UPPERCASE (for example, CLOBEX). Generic medications are shown in lowercase (for example, clobetasol).

### Medications moving to a lower tier

These medications are moving to a lower tier, making them more affordable.

Therapeutic use	Medication name	Tier placement	Lower-cost medications
Antimigraine Agents	AJOVY INJ	Tier 3 to Tier 2	---

### Medications moving to a higher tier

These medications are moving to a higher tier and will cost more because there are other lower-cost options. If your medication is listed below, you may still take it, but you may pay a higher cost. Please talk to your doctor about lower-cost option(s) to see if they will work for you.

Therapeutic use	Medication name	Tier placement	Lower-cost medications
